

RSC Communicable and Respiratory Disease Report for England

Key Statistics:

Week Number/Year..... 52/2021
 Week Starting - Ending..... 27/12/2021 - 02/01/2022
 No. of Practices..... 491
 Population..... 5,054,315

National (England)

- **Acute Bronchitis** : decreased from 6.7 in week 51 to 4.7 in week 52.
- **Asthma** : decreased from 13.1 in week 51 to 6.6 in week 52.
- **Common Cold** : decreased from 1.8 in week 51 to 0.9 in week 52.
- **Influenza-like illness** : decreased from 1.8 in week 51 to 0.9 in week 52.
- **Respiratory System Diseases** : decreased from 227.8 in week 51 to 140.3 in week 52.
- **COVID-19** : decreased from 1,048.7 in week 51 to 912.7 in week 52.

Regional (North, South, London and Midlands and East)

- **Acute Bronchitis** : decreased from 3.2 in week 51 to 1.3 in week 52 in the London region, decreased from 10.7 in week 51 to 7.5 in week 52 in the North region, decreased from 6.0 in week 51 to 4.4 in week 52 in the South region, and decreased from 5.5 in week 51 to 4.6 in week 52 in the Midlands And East region.
- **Asthma** : decreased from 12.1 in week 51 to 4.5 in week 52 in the London region, decreased from 16.9 in week 51 to 9.2 in week 52 in the North region, decreased from 10.6 in week 51 to 5.7 in week 52 in the South region, and decreased from 13.3 in week 51 to 6.7 in week 52 in the Midlands And East region.
- **Common Cold** : decreased from 2.1 in week 51 to 1.3 in week 52 in the London region, decreased from 1.7 in week 51 to 1.0 in week 52 in the North region, decreased from 1.7 in week 51 to 0.6 in week 52 in the South region, and decreased from 1.5 in week 51 to 1.2 in week 52 in the Midlands And East region.
- **Influenza-like illness** : decreased from 1.9 in week 51 to 0.6 in week 52 in the London region, decreased from 2.9 in week 51 to 1.3 in week 52 in the North region, decreased from 1.2 in week 51 to 1.0 in week 52 in the South region, and decreased from 1.3 in week 51 to 0.7 in week 52 in the Midlands And East region.
- **Respiratory System Diseases** : decreased from 173.9 in week 51 to 93.4 in week 52 in the London region, decreased from 288.8 in week 51 to 184.3 in week 52 in the North region, decreased from 208.5 in week 51 to 128.9 in week 52 in the South region, and decreased from 231.7 in week 51 to 144.6 in week 52 in the Midlands And East region.
- **COVID-19** : decreased from 1,502.8 in week 51 to 957.0 in week 52 in the London region, increased from 974.1 in week 51 to 1,093.8 in week 52 in the North region, decreased from 941.9 in week 51 to 769.9 in week 52 in the South region, and decreased from 885.4 in week 51 to 882.9 in week 52 in the Midlands And East region.

Comment:

Overall presentations of respiratory diseases have decreased this week as usual during the holiday period.

The overall rate of COVID-19 may have plateaued in all regions and all age bands apart from the North region and the population aged 65 years and over. COVID-19 incidence lags behind our other results, as this is a test rather than a clinical diagnosis, so this week's cases may not be complete.

This report does not include a virology update.

Winter Focus 2021/22

Please see page 15 for explanatory notes on the data.

(A) Influenza-like illness: national incidence rate 2021/22 by region*

(B) RCGP/UKHSA RSV, Influenza and SARS-CoV-2 Virology Swab Surveillance 2021/22*

* The rolling average line (blue) is based on 5 year historic RCGP RSC level (Graph A). The weekly virology samples displayed are offset from the ISO Week (Graphs B & C).

(C) RCGP/UKHSA RSV, Influenza and SARS-CoV-2 Virology Swab Surveillance 2021/22 by viral strain***(D) Influenza-like illness: national incidence rate 2021/22 by age group***

(E) Influenza-like illness: national incidence rate 2021/22 by age group*

This table shows the level of intensity of ILI by age band. MEM thresholds have been calculated separately for each age band - the ranges are shown in the table Threshold levels by age band.

(G) COVID-19 : national incidence rate 2021/22 by age group***(H) COVID-19 : national incidence rate 2021/22 by region***

1. Water & Food Borne Disorders:

5yr Avg National London North South Midlands And East

Infectious Intestinal Disease (ICD10: A00-A09)
Weekly incidence (per 100,000 **all ages**) by regions
for 2021/22 compared with 5 year average

Infectious Intestinal Disease (ICD10: A00-A09)
Weekly incidence (per 100,000 **0-4 years**) by regions
for 2021/22 compared with 5 year average

Non-Infective Enteritis & Colitis (ICD10: K50-K52)
Weekly incidence (per 100,000 **all ages**) by region
for 2021/22 compared with 5 year average

Viral Hepatitis (ICD10: B15-B19)
Weekly incidence (per 100,000 **all ages**) by region
for 2021/22 compared with 5 year average

2. Environmentally Sensitive Disorders:

5yr Avg National London North South Midlands And East

Asthma (ICD10: J45-J46)
Weekly incidence (per 100,000 all ages) by region
for 2021/22 compared with 5 year average

Disorders of Conjunctiva (ICD10: H10-H13)
Weekly incidence (per 100,000 all ages) by region
for 2021/22 compared with 5 year average

Hayfever/Allergic Rhinitis (ICD10: J30)
Weekly incidence (per 100,000 all ages) by region
for 2021/22 compared with 5 year average

Symptoms involving Respiratory & Chest (ICD10: R05-R07,R09)
Weekly incidence (per 100,000 all ages) by region
for 2021/22 compared with 5 year average

3. Respiratory Infections:

5yr Avg National London North South Midlands And East

Acute Bronchitis (ICD10: J20-J21,J40)
Weekly incidence (per 100,000 all ages) by region
for 2021/22 compared with 5 year average

Common Cold (ICD10: J00,J06)
Weekly incidence (per 100,000 all ages) by region
for 2021/22 compared with 5 year average

Influenza-like illness (ICD10: J09-J11)
Weekly incidence (per 100,000 all ages) by region
for 2021/22 compared with 5 year average

Acute Laryngitis/Tracheitis (ICD10: J04)
Weekly incidence (per 100,000 all ages) by region
for 2021/22 compared with 5 year average

Pleurisy (ICD10: R091)
Weekly incidence (per 100,000 all ages) by region
for 2021/22 compared with 5 year average

Pneumonia/Pneumonitis (ICD10: J12-J18)
Weekly incidence (per 100,000 all ages) by region
for 2021/22 compared with 5 year average

3. Respiratory Infections(Continued):

5yr Avg National London North South Midlands And East

Respiratory System Diseases (ICD10: J00-J99)
Weekly incidence (per 100,000 all ages) by region
for 2021/22 compared with 5 year average

Acute Sinusitis (ICD10: J01)
Weekly incidence (per 100,000 all ages) by region
for 2021/22 compared with 5 year average

Strep Sore Throat, Scarletina and Peritonsillar Abscess (ICD10: A38,J020,J36)
Weekly incidence (per 100,000 all ages) by region
for 2021/22 compared with 5 year average

Acute Tonsillitis/Pharyngitis (ICD10: J02-J03)
Weekly incidence (per 100,000 all ages) by region
for 2021/22 compared with 5 year average

Upper Respiratory Tract Infections (URTI)(ICD10: J00-J06)
Weekly incidence (per 100,000 all ages) by region
for 2021/22 compared with 5 year average

Whooping Cough (ICD10: A37)
Weekly incidence (per 100,000 all ages) by region
for 2021/22 compared with 5 year average

3. Respiratory Infections(Continued):

5yr Avg National London North South Midlands And East

Infectious Mononucleosis (ICD10: B27)
Weekly incidence (per 100,000 all ages) by region
for 2021/22 compared with 5 year average

Lower Respiratory Tract Infections (LRTI)(ICD10: J20-J22)
Weekly incidence (per 100,000 all ages) by region
for 2021/22 compared with 5 year average

Acute Otitis Media (ICD10: H650-H651,H660,H669)
Weekly incidence (per 100,000 all ages) by region
for 2021/22 compared with 5 year average

4. Vaccine Sensitive Disorders

5yr Avg National London North South Midlands And East

Measles (ICD10: B05)
Weekly incidence (per 100,000 all ages) by region
for 2021/22 compared with 5 year average

Mumps (ICD10: B26)
Weekly incidence (per 100,000 all ages) by region
for 2021/22 compared with 5 year average

Rubella (ICD10: B06)
Weekly incidence (per 100,000 all ages) by region
for 2021/22 compared with 5 year average

5. Skin Contagions

Bullous Dermatoses (ICD10: L10-L14)
Weekly incidence (per 100,000 all ages) by region
for 2021/22 compared with 5 year average

Chickenpox (ICD10: B01)
Weekly incidence (per 100,000 all ages) by region
for 2021/22 compared with 5 year average

5. Skin Contagions (Continued)

5yr Avg National London North South Midlands And East

Herpes Simplex (ICD10: B00)
Weekly incidence (per 100,000 all ages) by region
for 2021/22 compared with 5 year average

Herpes Zoster (ICD10: B02)
Weekly incidence (per 100,000 all ages) by region
for 2021/22 compared with 5 year average

Infections of Skin & Subcutaneous Tissue (ICD10: L00-L08)
Weekly incidence (per 100,000 all ages) by region
for 2021/22 compared with 5 year average

Scabies (ICD10: B86)
Weekly incidence (per 100,000 all ages) by region
for 2021/22 compared with 5 year average

Symptoms involving Skin & Oth Integument Tiss (ICD10: R20-R23)
Weekly incidence (per 100,000 all ages) by region
for 2021/22 compared with 5 year average

Impetigo (ICD10: L01)
Weekly incidence (per 100,000 all ages) by region
for 2021/22 compared with 5 year average

6. Disorders Affecting the Nervous System

5yr Avg National London North South Midlands And East

Disorders of The Peripheral Nervous System (ICD10: G50-G64,G70-G72)
Weekly incidence (per 100,000 all ages) by region
for 2021/22 compared with 5 year average

Meningitis/Encephalitis (ICD10: A170-A171,A390,A38-A85,A87,G00-G05)
Weekly incidence (per 100,000 all ages) by region
for 2021/22 compared with 5 year average

Symptoms Involving Nervous & Musculoskeletal (ICD10: R25-R29)
Weekly incidence (per 100,000 all ages) by region
for 2021/22 compared with 5 year average

7. Genitourinary System Disorders

Urinary Tract Infection/Cystitis (ICD10: N30,N390)
Weekly incidence (per 100,000 all ages) by region
for 2021/22 compared with 5 year average

8. Tabular Summary by Disease

Disease Name	Week beginning Week ending		27/12/2021 02/01/2022		20/12/2021 26/12/2021		13/12/2021 19/12/2021		06/12/2021 12/12/2021

FURTHER INFORMATION:

About the report

Winter focus

The first two pages of data within this report focus on Influenza-like illness and COVID-19, in order to provide information about seasonal influenza and early warnings of any epidemic.

Rate calculation

Each weekly incidence rate is presented per 100,000 population. All presentations are for males and females, and for all age groups, unless otherwise stated.

The denominator used for this report is taken from our most recent extract of data from GP practice systems, and includes all patients currently registered with eligible practices. The denominator varies week-on-week as patients register and deregister; it may also be the case that all patients from an individual practice are excluded because of problems with the data extraction from that practice in a specific week. As stated above, patients who have withheld consent for data-sharing are excluded.

In addition to the national rate, we present data for the four NHS England regions: North; Midlands and East; South; and London.

Five-year averages

Weekly rates are set against a five-year average, previously we reported against a ten-year average. The change to a five-year average was made because longer-term trends in the incidence of disease have led to weekly rates for certain diseases becoming increasingly divergent from their ten-year average. The use of five-year averages lessens this effect and enables more meaningful comparison.

Threshold calculation for Influenza-Like Illness (ILI)

We are now using the Moving Epidemic Method (MEM) to calculate threshold and intensity levels for Influenza-Like Illness. MEM works by identifying seasonal epidemic peaks and then calculates thresholds and intensity levels based on the pre and post epidemic values. This allows us to report the severity of ILI against multiple thresholds, rather than a simple comparison with the five-year average as the wide variation in ILI year on year, especially during the seasonal peak, makes the average less representative.

In addition to the All Ages thresholds, we have also calculated thresholds for three age bands: those aged under 15, 15-64 year olds and those aged 65 and over. ILI incidence rates vary among different age groups, and the age-specific thresholds allow us to highlight epidemics where ILI disproportionately affects a particular age group.

This methodology is used by the European Centre for Disease Prevention and Control to standardise reporting of influenza activity across Europe, and is also in use by the UK Health Security Agency. Full details of the methodology can be found in: Vega *et al.* (2012) Influenza surveillance in Europe: establishing epidemic thresholds by the moving epidemic method. Influenza and Other Respiratory Viruses 7(4), 546–558. For ease of graphical representation, the final threshold (Very High) is not included in Graph A, page 2, but it is part of Table 3, page 3.

Both the *all-ages* thresholds and the *age-specific* thresholds are shown in Table 2, page 3. Ten years of data were used for *all-ages* and *age-specific* thresholds calculation (winter seasons 2006/07- 2016/17 excluding 2009/10).

About the Royal College of General Practitioners (RCGP) Research and Surveillance Centre (RSC)

Acknowledgement:

Staff from the Data Science department at the National Physical Laboratory (<https://www.npl.co.uk/data-science>) assisted in the provision of and extension of the primary care national surveillance reports during the 2020 SARS-CoV-2 pandemic; as well as adding resilience.

What we do

The RCGP RSC was established in 1957, with the current name in use since 2009. The Centre is an internationally renowned source of information, analysis and interpretation concerning the onset, patterns, prevalence and trends over time of morbidity in primary care. The RSC is an active research and surveillance unit that collects and monitors data; its most important research is the surveillance of influenza and the monitoring of vaccine effectiveness.

The RSC data and analytics hub is housed at the Oxford-Royal College of General Practitioners Research and Surveillance Centre.

Further information about the RSC can be found on our website:

<http://www.rcgp.org.uk/rsc>

Our data extraction process and information governance

Data are extracted twice weekly from practice systems by Wellbeing data management on the RCGP's behalf. Patients who have withheld consent for data sharing are excluded from the extraction process.

Data are pseudonymised as close to source as possible. Data are held on secure servers at the RCGP data and analytics hub at the Oxford-Royal College of General Practitioners Research and Surveillance Centre. Both Wellbeing data management and the University of Oxford are Registered and compliant with the Data Protection Act and fully compliant with all relevant NHS Digital data information governance best practice.

What the data is used for

The RCGP RSC has been providing reports weekly about health and disease, called the Weekly Returns Service (WRS) since 1964. The WRS monitors the number of patients consulting with new episodes of illness classified by diagnosis in England and provides weekly incidence rates per 100,000 population for these new episodes of illness. It is the key primary care element of the national disease monitoring systems run by the UK Health Security Agency. The bulletin can be found at the following URL:

<https://www.gov.uk/government/publications/syndromic-surveillance-summary>

In addition to the WRS, the data is used for other research studies. Any other uses of the data for research follow ethical approval or agreement from NIHR proportionate review, and where relevant Health Research Authority Confidential Advisory Group advice that further approval is not needed. Full details can be found on our website:

<http://www.rcgp.org.uk/rsc>
