

RSC Communicable and Respiratory Disease Report for England

Key Statistics:

Week Number/Year..... 27/2023
 Week Starting - Ending..... 03/07/2023 - 09/07/2023
 No. of Practices..... 1,117
 Population..... 10,873,069

National (England)

- **Acute Bronchitis** : decreased from **5.1** in week 26 to **5.0** in week 27.
- **Asthma** : increased from **9.3** in week 26 to **10.2** in week 27.
- **Common Cold** : increased from **0.9** in week 26 to **1.1** in week 27.
- **Influenza-like illness** : increased from **0.9** in week 26 to **1.0** in week 27.
- **Respiratory System Diseases** : increased from **247.7** in week 26 to **251.3** in week 27.
- **COVID-19** : increased from **3.7** in week 26 to **4.7** in week 27.

Regional (North, South, London and Midlands and East)

- **Acute Bronchitis** : was unchanged at **2.3** in week 26 and **2.3** in week 27 in the London region, decreased from **7.6** in week 26 to **7.1** in week 27 in the North region, increased from **3.7** in week 26 to **4.4** in week 27 in the South region, and decreased from **7.1** in week 26 to **6.1** in week 27 in the Midlands And East region.
- **Asthma** : decreased from **8.2** in week 26 to **7.9** in week 27 in the London region, increased from **9.1** in week 26 to **10.9** in week 27 in the North region, increased from **9.9** in week 26 to **11.4** in week 27 in the South region, and decreased from **10.0** in week 26 to **9.8** in week 27 in the Midlands And East region.
- **Common Cold** : increased from **1.1** in week 26 to **1.9** in week 27 in the London region, increased from **0.5** in week 26 to **0.9** in week 27 in the North region, increased from **0.8** in week 26 to **0.9** in week 27 in the South region, and increased from **1.0** in week 26 to **1.1** in week 27 in the Midlands And East region.
- **Influenza-like illness** : was unchanged at **1.3** in week 26 and **1.3** in week 27 in the London region, increased from **0.8** in week 26 to **1.0** in week 27 in the North region, increased from **0.7** in week 26 to **1.2** in week 27 in the South region, and increased from **0.6** in week 26 to **0.7** in week 27 in the Midlands And East region.
- **Respiratory System Diseases** : increased from **202.9** in week 26 to **206.4** in week 27 in the London region, increased from **289.4** in week 26 to **298.4** in week 27 in the North region, increased from **236.8** in week 26 to **239.9** in week 27 in the South region, and decreased from **266.3** in week 26 to **258.0** in week 27 in the Midlands And East region.
- **COVID-19** : increased from **2.6** in week 26 to **3.5** in week 27 in the London region, increased from **3.9** in week 26 to **5.4** in week 27 in the North region, increased from **4.5** in week 26 to **4.9** in week 27 in the South region, and increased from **3.6** in week 26 to **4.8** in week 27 in the Midlands And East region.

Comment:

Overall presentations with respiratory infections have increased this week though they are below the levels usually seen at this time of year (page 9). Rates of allergic rhinitis are past their peak and below the seasonal average (page 7).

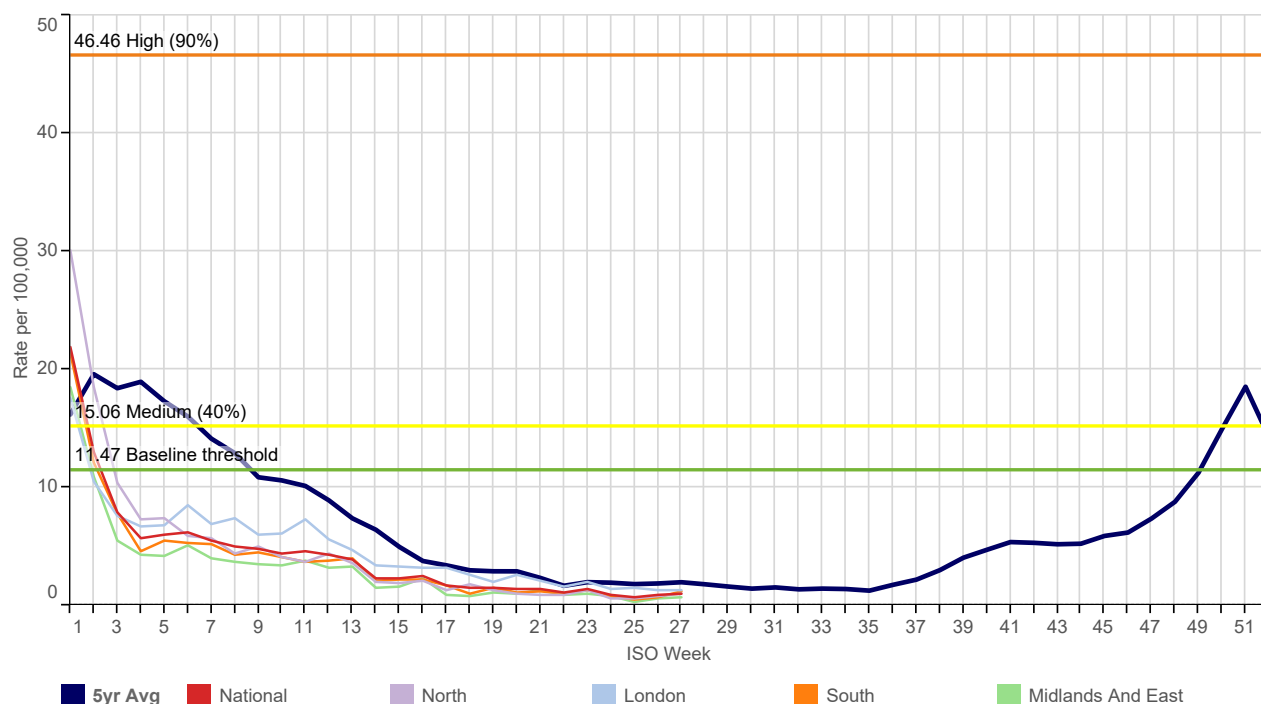

This week there has been a small rise in rates of COVID-19 across all regions and age bands. Scabies rates continue to be above the seasonal norm particularly in the North region (page 9).

This report includes a virology update. SARS-CoV-2, influenza and RSV are the predominant circulating viruses detected.

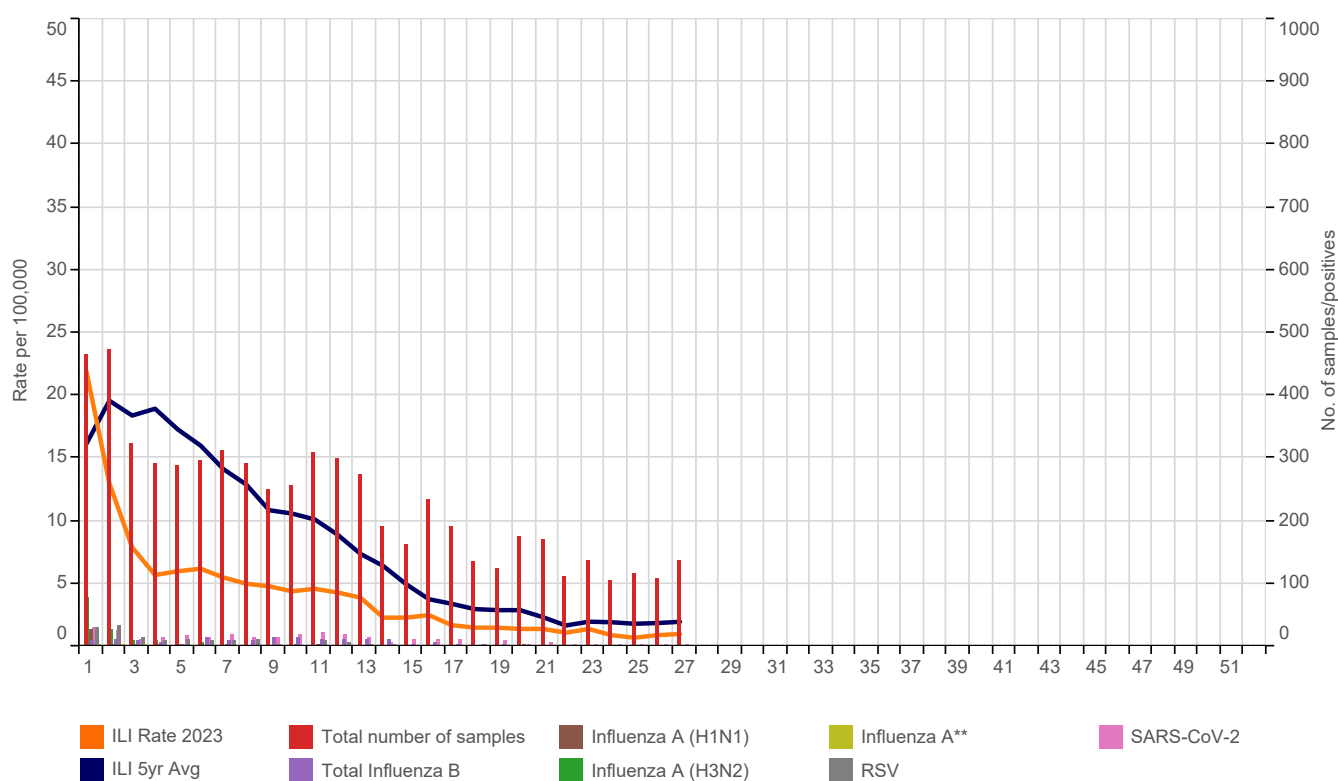

2023 Focus

Please see page 15 for explanatory notes on the data.

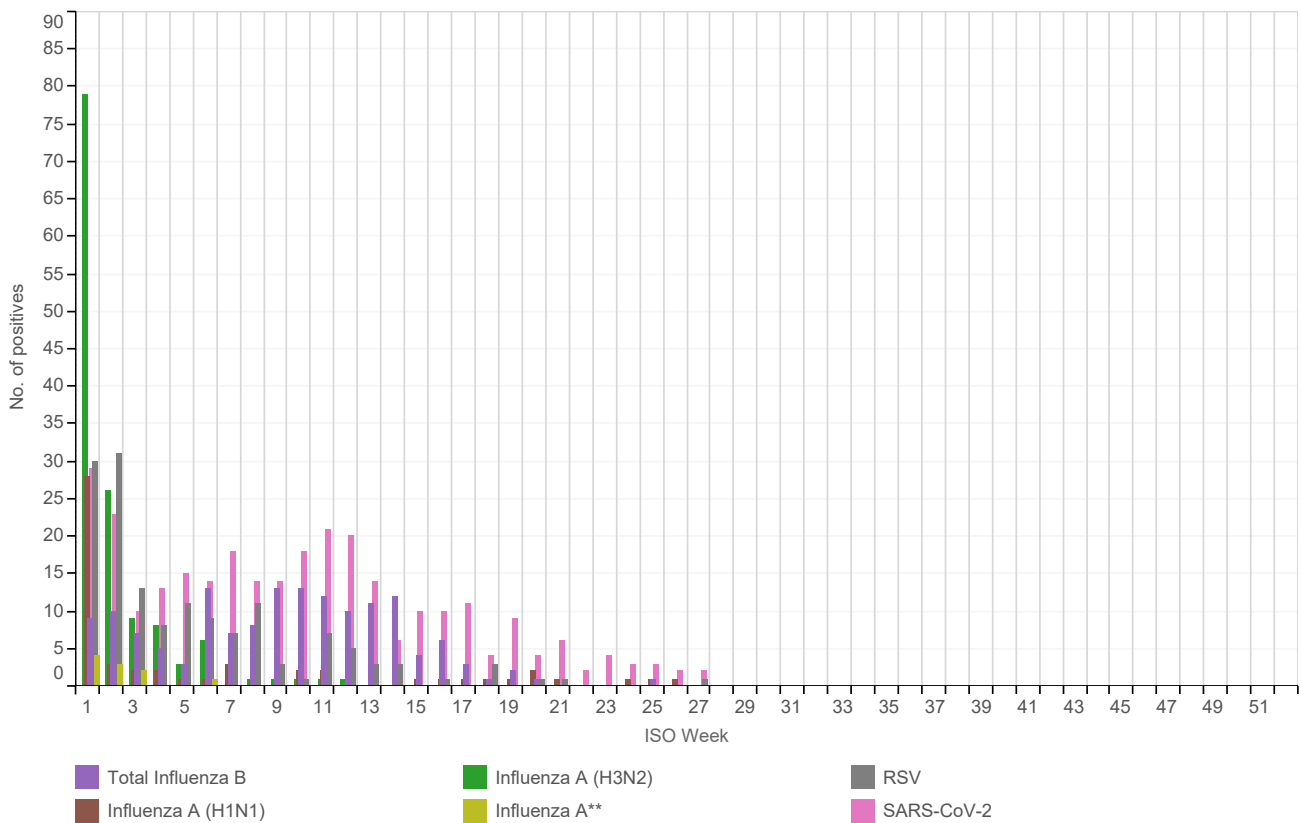

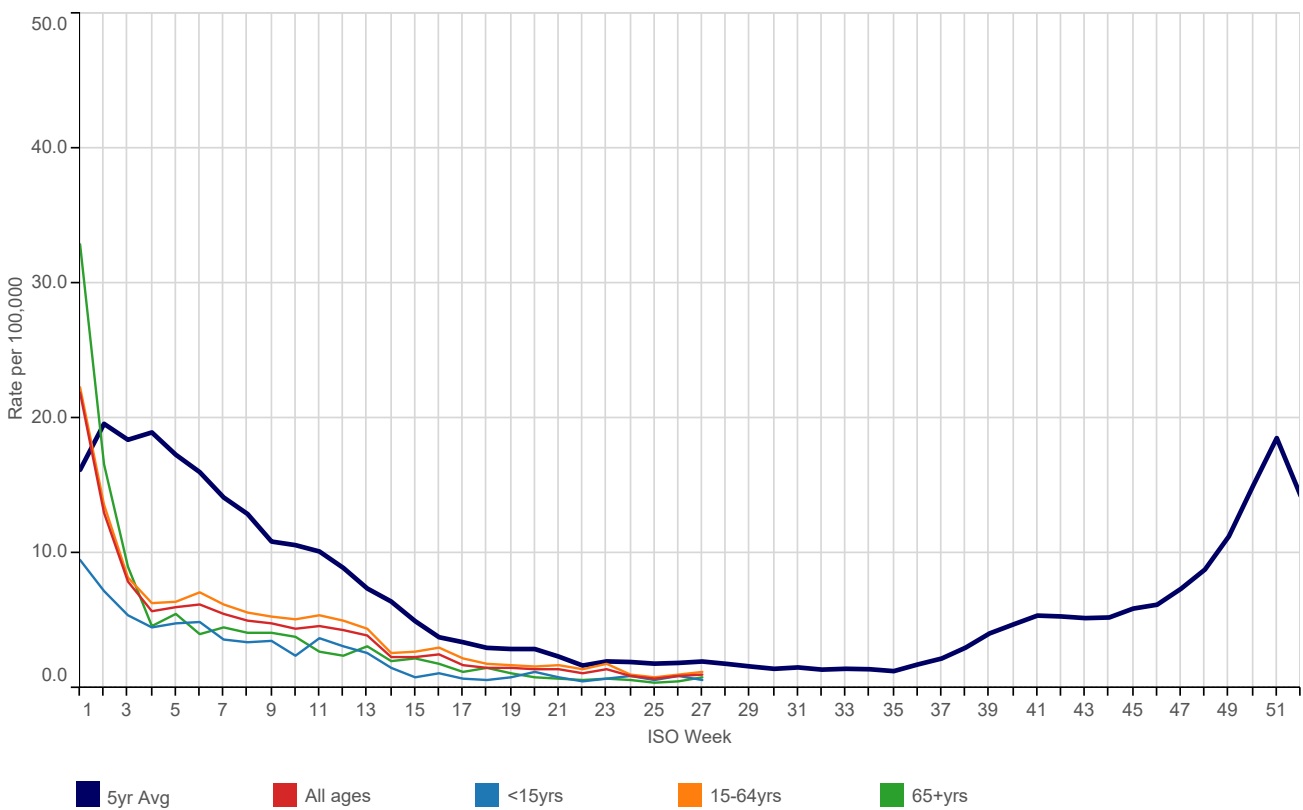

(A) Influenza-like illness: national incidence rate 2023 by region*

(B) RCGP/UKHSA RSV, Influenza and SARS-CoV-2 Virology Swab Surveillance 2023*

* The seasonal average line (blue) is based on 5 year historic RCGP RSC data (Graph A & B). The weekly virology samples displayed are offset from the ISO Week (Graphs B & C). **No specified subtype, or coinfection with H1N1 and H3N2.

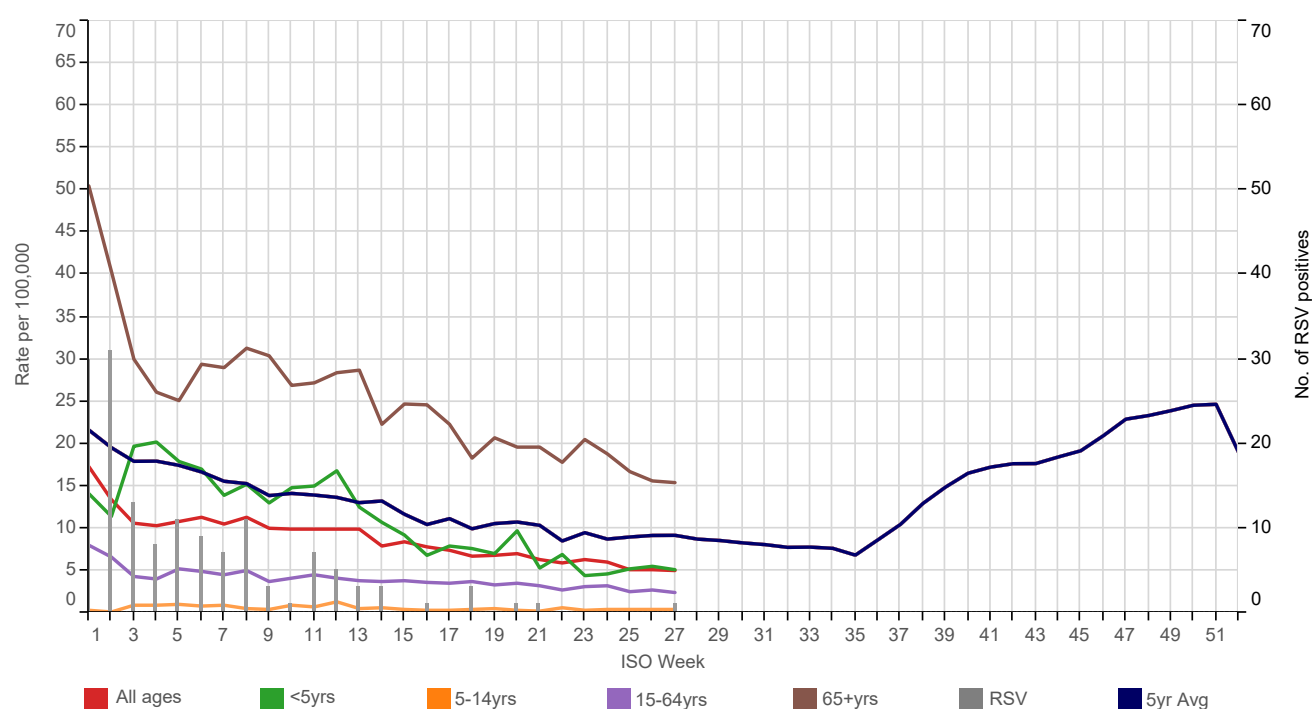

(C) RCGP/UKHSA RSV, Influenza and SARS-CoV-2 Virology Swab Surveillance 2023 by viral strain***(D) Influenza-like illness: national incidence rate 2023 by age group***

(E) Influenza-like illness: national incidence rate 2023 by age group*

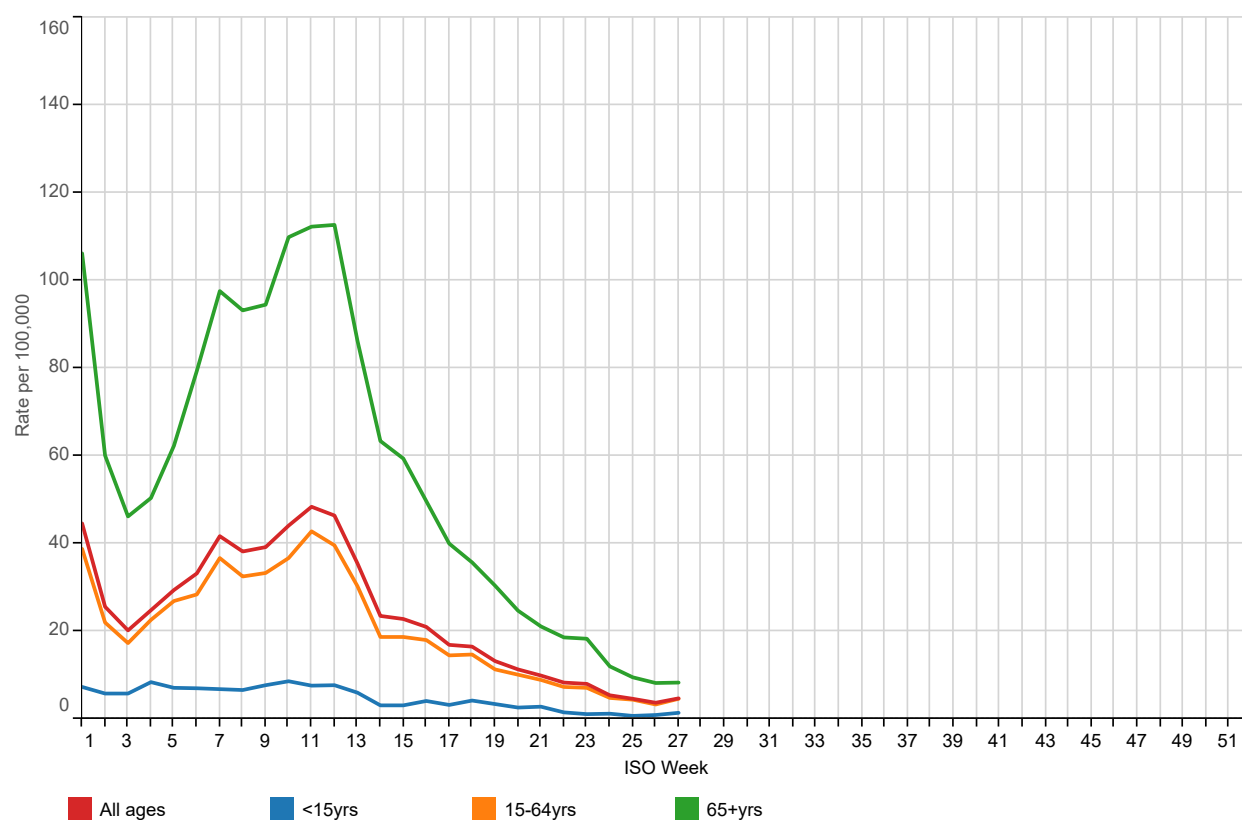

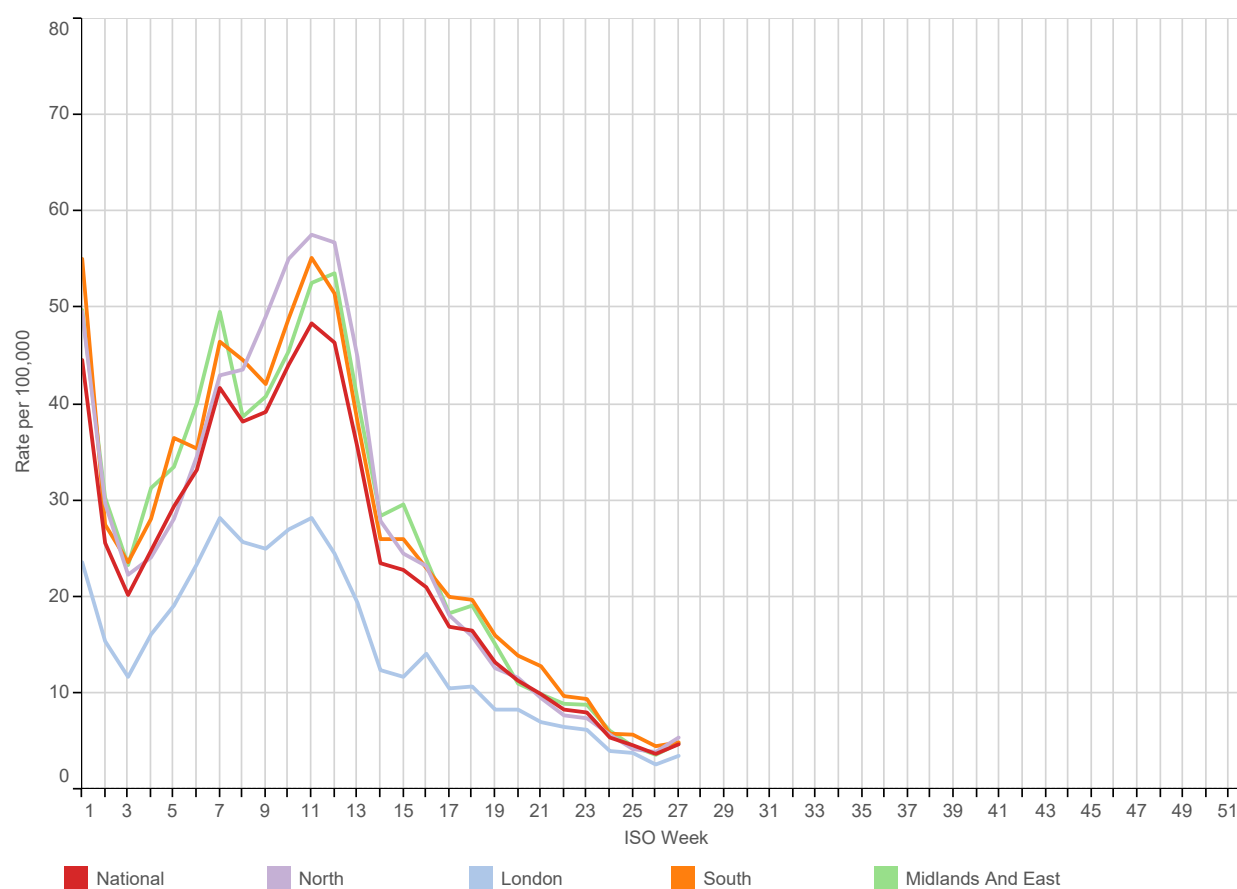

This table shows the level of intensity of ILI by age band. MEM thresholds have been calculated separately for each age band - the ranges are shown in the table Threshold levels by age band.

(G) COVID-19 : national incidence rate 2023 by age group***(H) COVID-19 : national incidence rate 2023 by region***

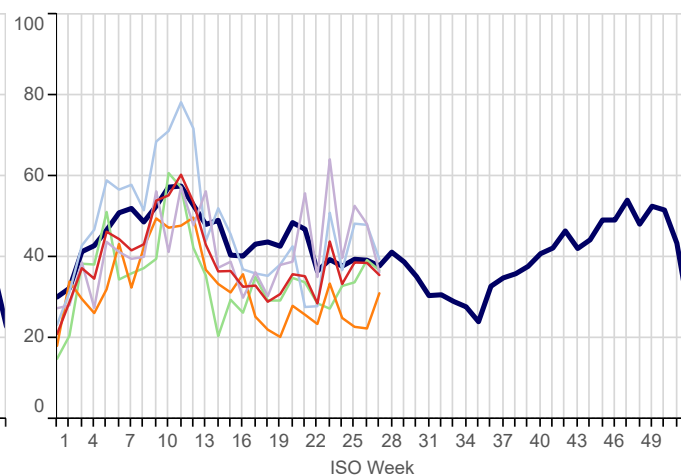

1. Water & Food Borne Disorders:

5yr Avg National North London South Midlands And East

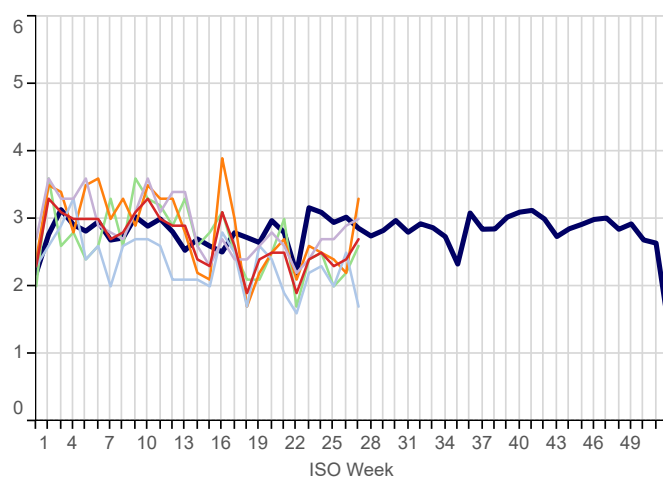

Infectious Intestinal Disease (ICD10: A00-A09)
Weekly incidence (per 100,000 **all ages**) by regions
for 2023 compared with 5 year average

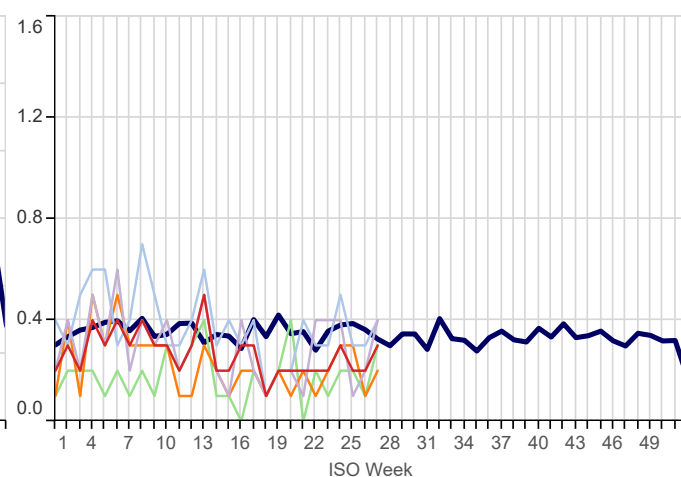

Infectious Intestinal Disease (ICD10: A00-A09)
Weekly incidence (per 100,000 **0-4 years**) by regions
for 2023 compared with 5 year average

Non-Infective Enteritis & Colitis (ICD10: K50-K52)
Weekly incidence (per 100,000 **all ages**) by region
for 2023 compared with 5 year average

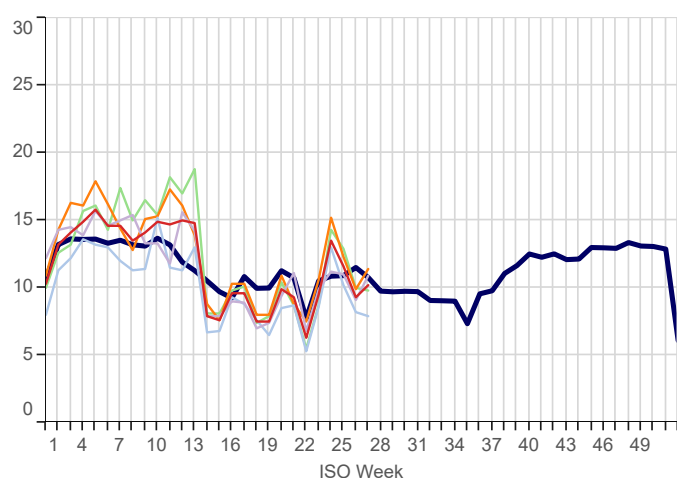

Viral Hepatitis (ICD10: B15-B19)
Weekly incidence (per 100,000 **all ages**) by region
for 2023 compared with 5 year average

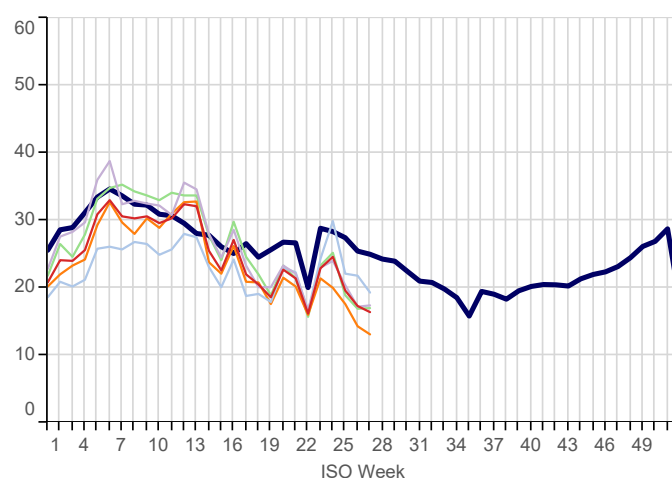

2. Environmentally Sensitive Disorders:

5yr Avg National North London South Midlands And East

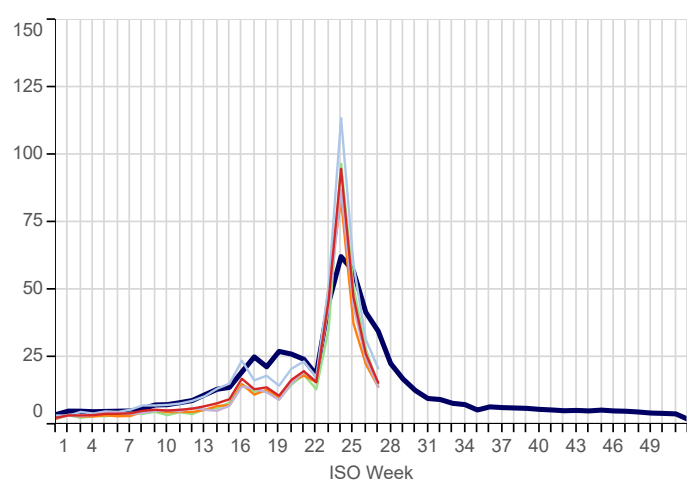

Asthma (ICD10: J45-J46)
Weekly incidence (per 100,000 all ages) by region
for 2023 compared with 5 year average

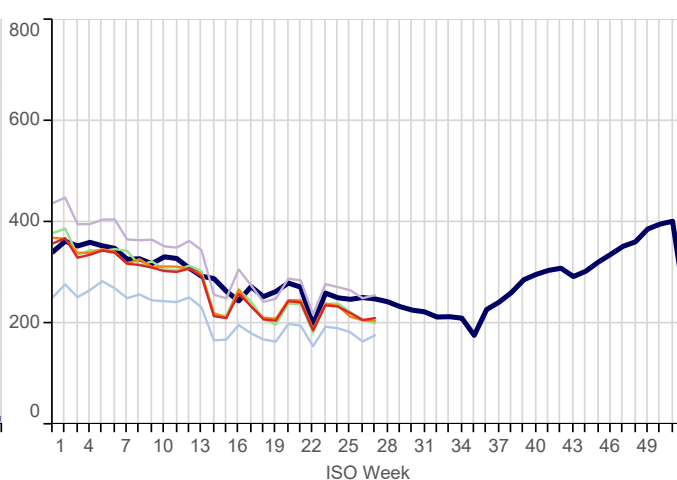

Disorders of Conjunctiva (ICD10: H10-H13)
Weekly incidence (per 100,000 all ages) by region
for 2023 compared with 5 year average

Hayfever/Allergic Rhinitis (ICD10: J30)
Weekly incidence (per 100,000 all ages) by region
for 2023 compared with 5 year average

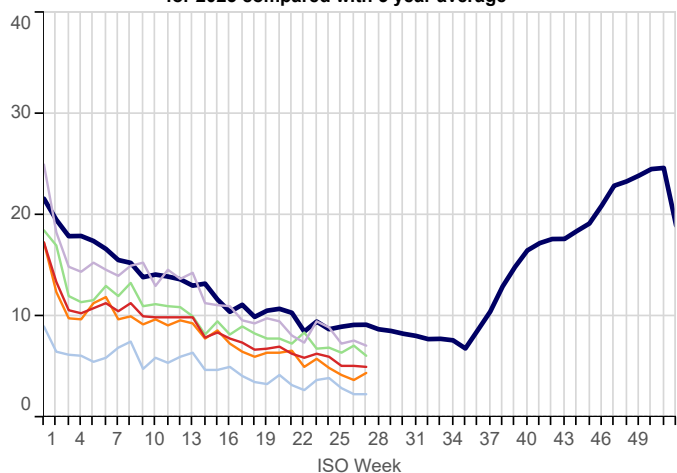

Symptoms involving Respiratory & Chest (ICD10: R05-R07,R09)
Weekly incidence (per 100,000 all ages) by region
for 2023 compared with 5 year average

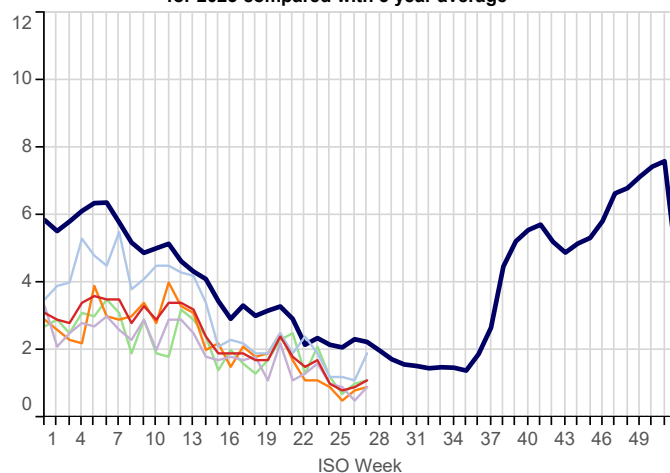

3. Respiratory Infections:

5yr Avg National North London South Midlands And East

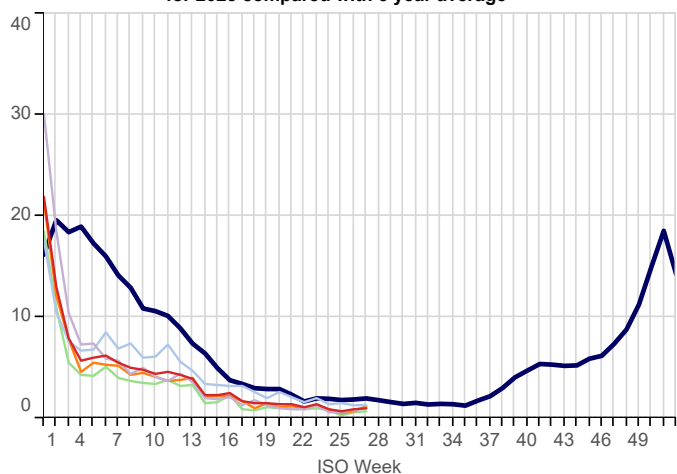

Acute Bronchitis (ICD10: J20-J21,J40)
Weekly incidence (per 100,000 all ages) by region
for 2023 compared with 5 year average

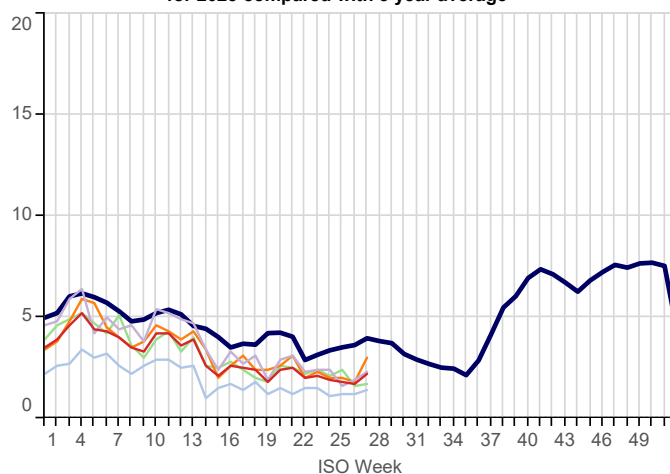

Common Cold (ICD10: J00,J06)
Weekly incidence (per 100,000 all ages) by region
for 2023 compared with 5 year average

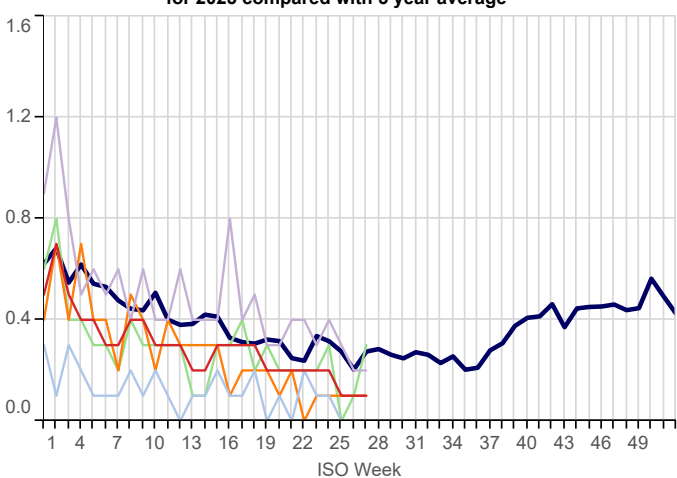

Influenza-like illness (ICD10: J09-J11)
Weekly incidence (per 100,000 all ages) by region
for 2023 compared with 5 year average

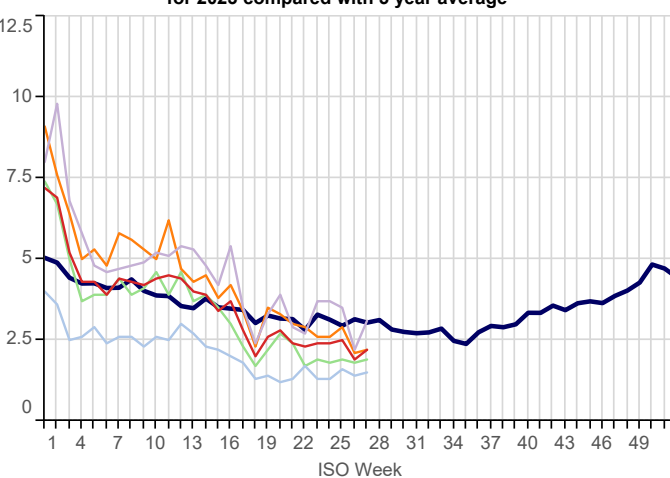

Acute Laryngitis/Tracheitis (ICD10: J04)
Weekly incidence (per 100,000 all ages) by region
for 2023 compared with 5 year average

Pleurisy (ICD10: R091)
Weekly incidence (per 100,000 all ages) by region
for 2023 compared with 5 year average

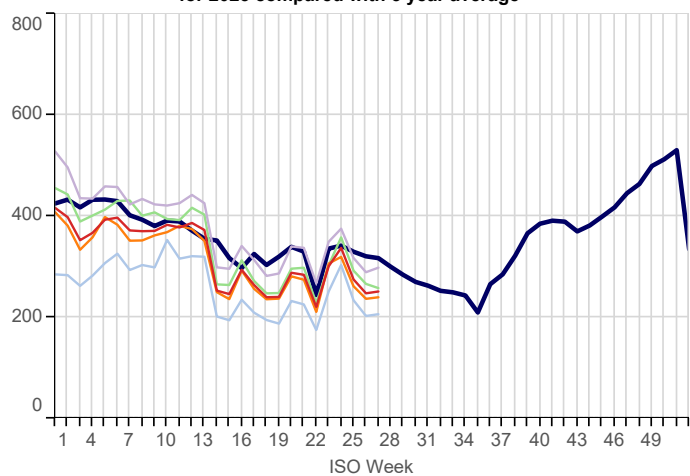

Pneumonia/Pneumonitis (ICD10: J12-J18)
Weekly incidence (per 100,000 all ages) by region
for 2023 compared with 5 year average

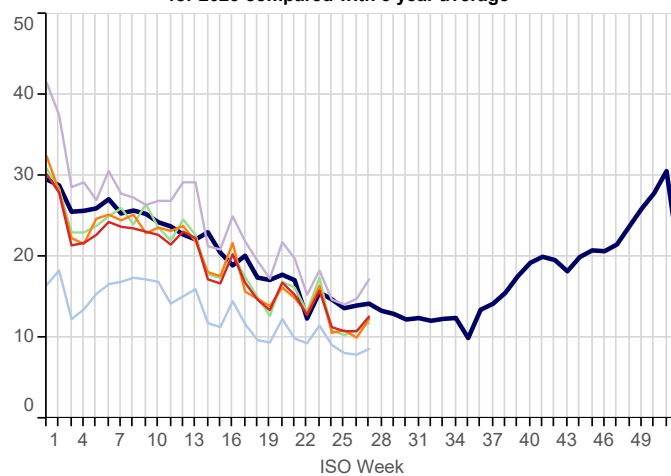

3. Respiratory Infections(Continued):

5yr Avg National North London South Midlands And East

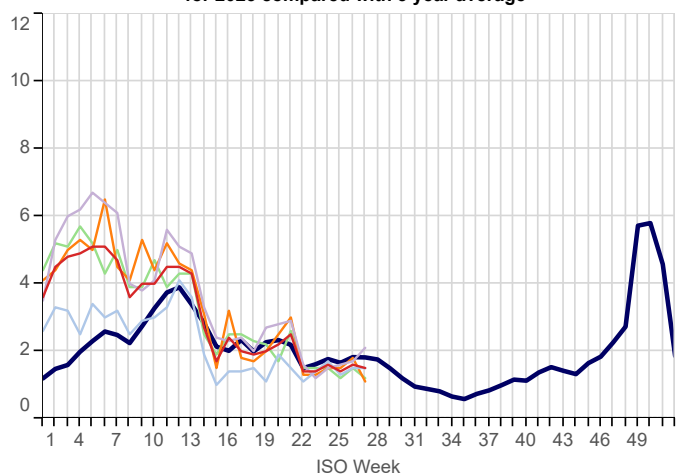

Respiratory System Diseases (ICD10: J00-J99)
Weekly incidence (per 100,000 all ages) by region
for 2023 compared with 5 year average

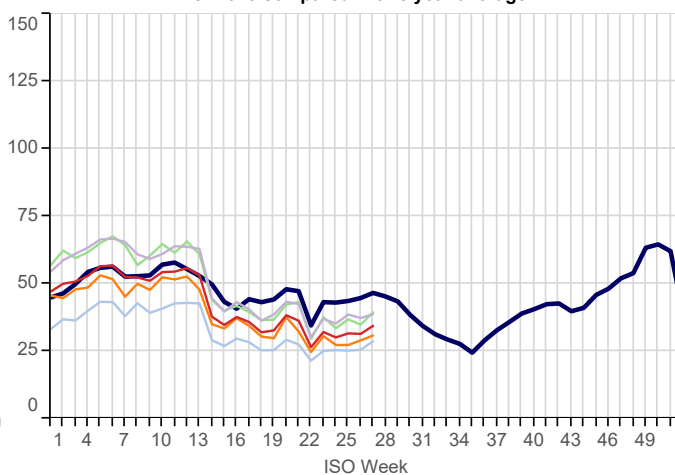

Acute Sinusitis (ICD10: J01)
Weekly incidence (per 100,000 all ages) by region
for 2023 compared with 5 year average

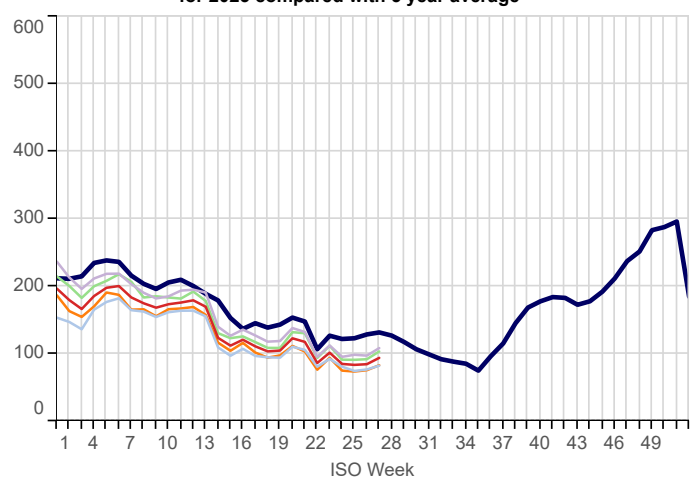

Strep Sore Throat, Scarletina and Peritonsillar Abscess (ICD10: A38,J020,J36)
Weekly incidence (per 100,000 all ages) by region
for 2023 compared with 5 year average

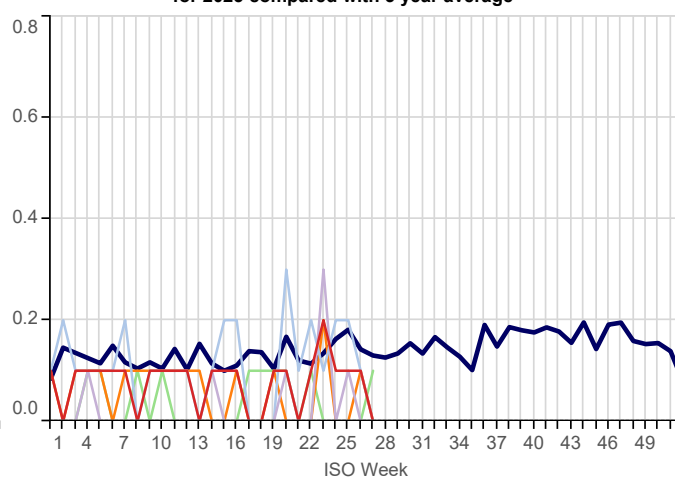

Acute Tonsillitis/Pharyngitis (ICD10: J02-J03)
Weekly incidence (per 100,000 all ages) by region
for 2023 compared with 5 year average

Upper Respiratory Tract Infections (URTI)(ICD10: J00-J06)
Weekly incidence (per 100,000 all ages) by region
for 2023 compared with 5 year average

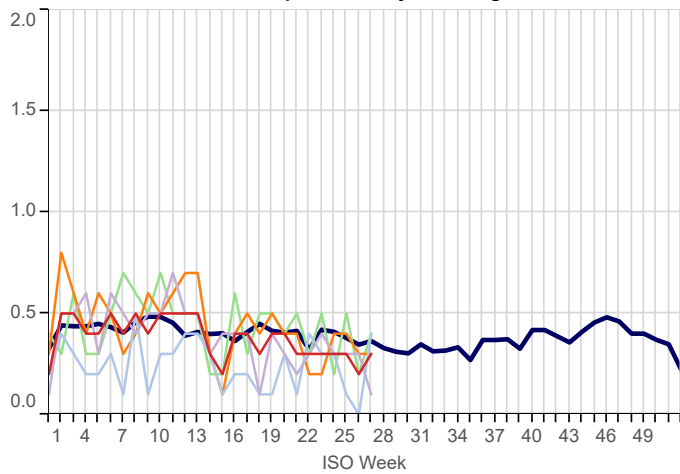

Whooping Cough (ICD10: A37)
Weekly incidence (per 100,000 all ages) by region
for 2023 compared with 5 year average

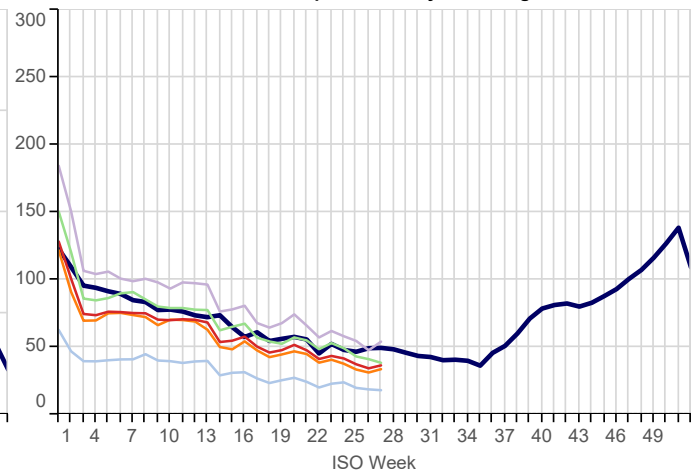

3. Respiratory Infections(Continued):

5yr Avg National North London South Midlands And East

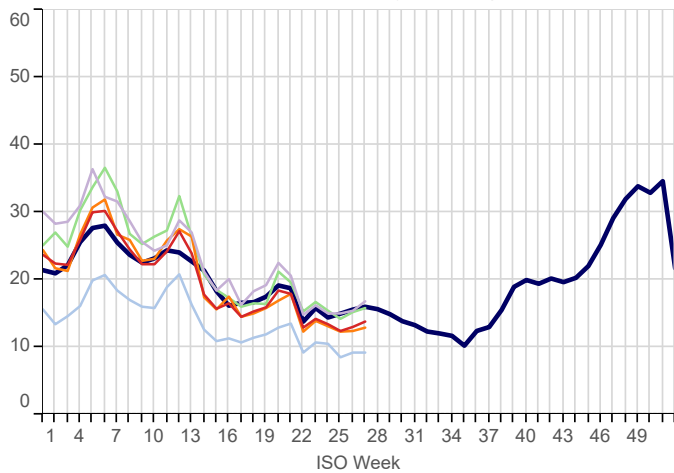

Infectious Mononucleosis (ICD10: B27)
Weekly incidence (per 100,000 all ages) by region
for 2023 compared with 5 year average

Lower Respiratory Tract Infections (LRTI)(ICD10: J20-J22)
Weekly incidence (per 100,000 all ages) by region
for 2023 compared with 5 year average

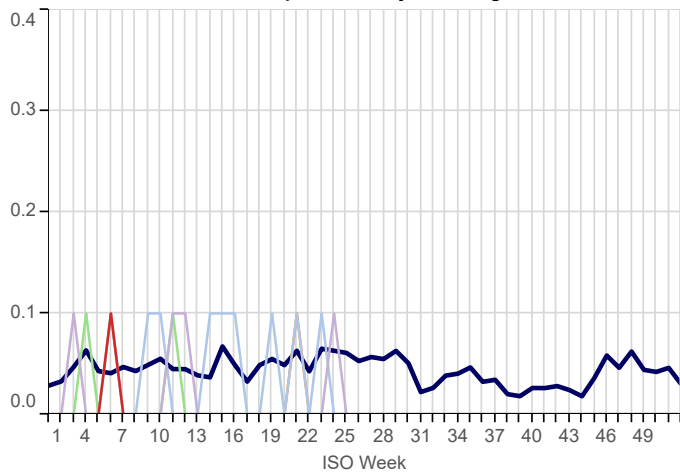

Acute Otitis Media (ICD10: H650-H651,H660,H669)
Weekly incidence (per 100,000 all ages) by region
for 2023 compared with 5 year average

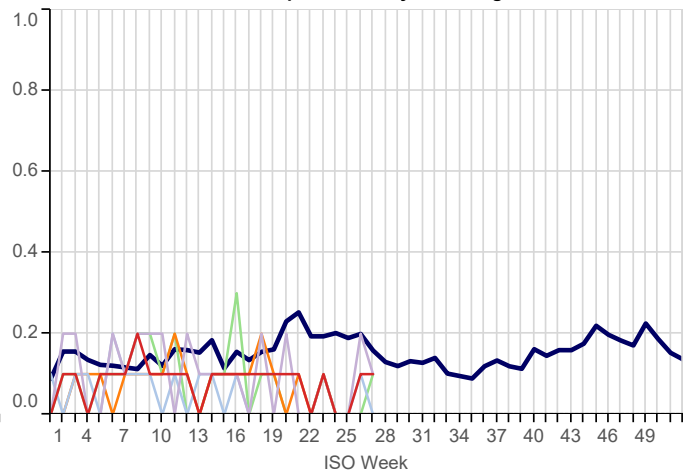

4. Vaccine Sensitive Disorders

5yr Avg National North London South Midlands And East

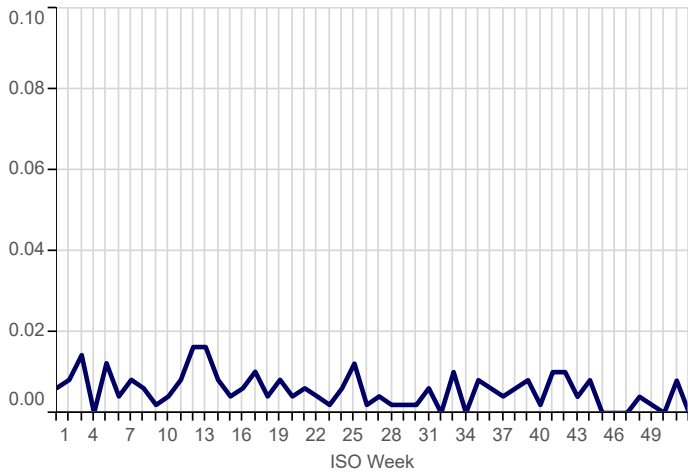

Measles (ICD10: B05)
Weekly incidence (per 100,000 all ages) by region
for 2023 compared with 5 year average

Mumps (ICD10: B26)
Weekly incidence (per 100,000 all ages) by region
for 2023 compared with 5 year average

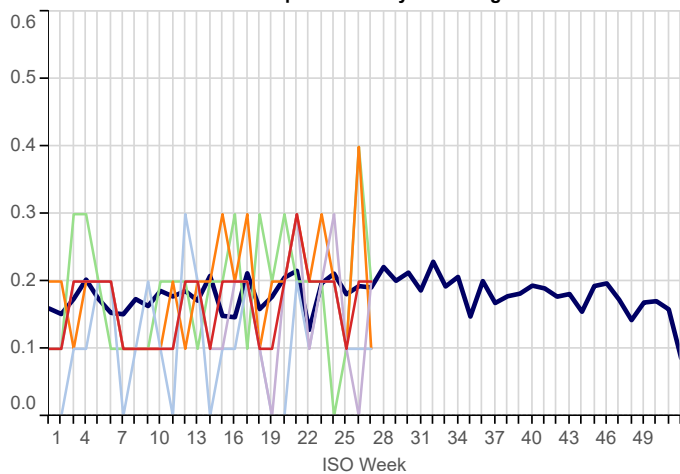

Rubella (ICD10: B06)
Weekly incidence (per 100,000 all ages) by region
for 2023 compared with 5 year average

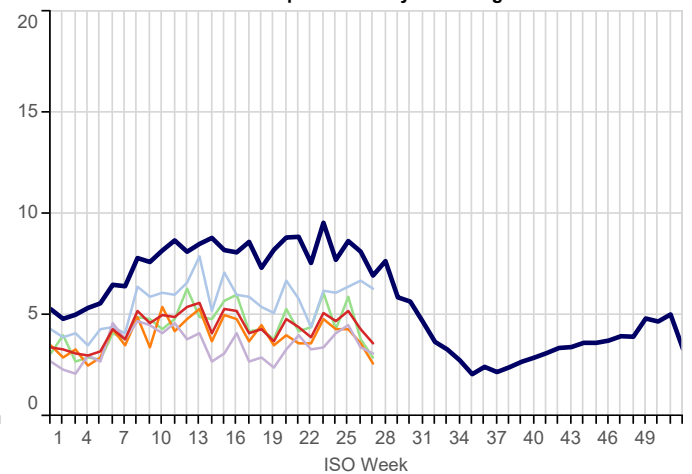

5. Skin Contagions

Bullous Dermatoses (ICD10: L10-L14)
Weekly incidence (per 100,000 all ages) by region
for 2023 compared with 5 year average

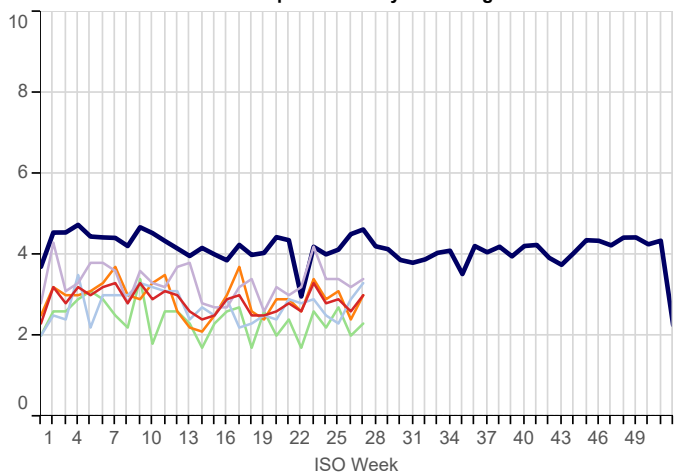

Chickenpox (ICD10: B01)
Weekly incidence (per 100,000 all ages) by region
for 2023 compared with 5 year average

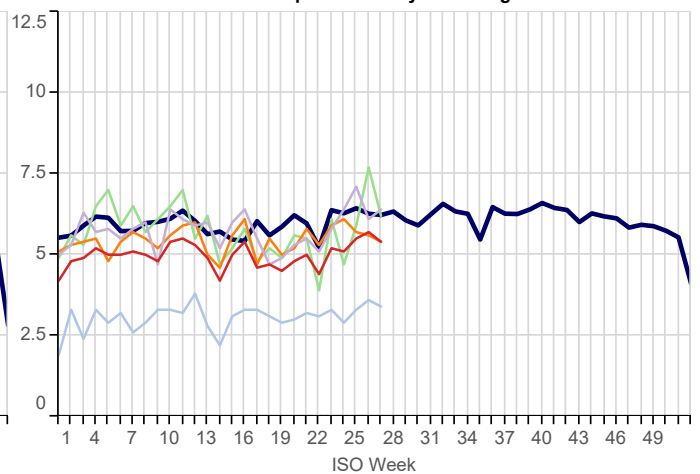

5. Skin Contagions (Continued)

■ 5yr Avg ■ National ■ North ■ London ■ South ■ Midlands And East

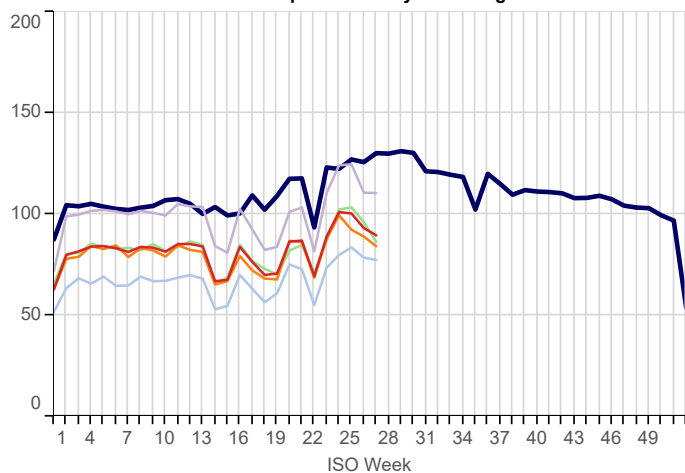

Herpes Simplex (ICD10: B00)
Weekly incidence (per 100,000 all ages) by region
for 2023 compared with 5 year average

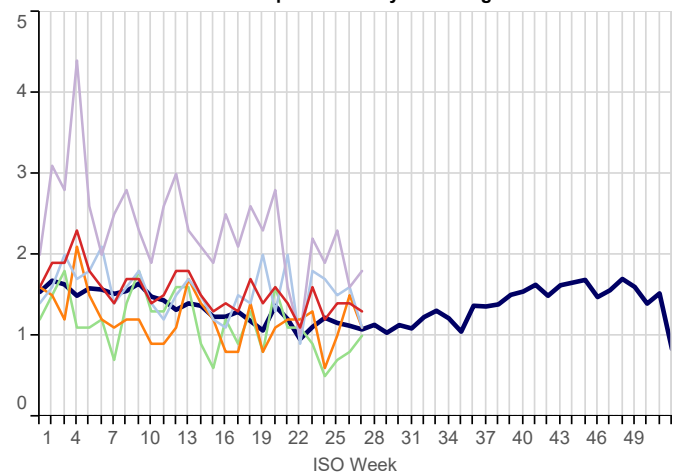

Herpes Zoster (ICD10: B02)
Weekly incidence (per 100,000 all ages) by region
for 2023 compared with 5 year average

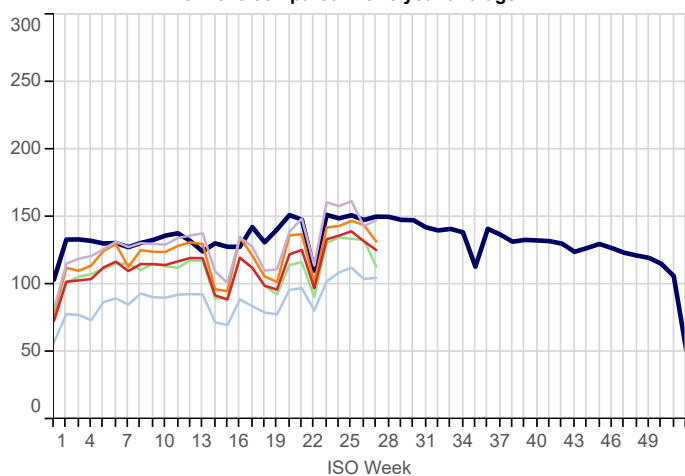

Infections of Skin & Subcutaneous Tissue (ICD10: L00-L08)
Weekly incidence (per 100,000 all ages) by region
for 2023 compared with 5 year average

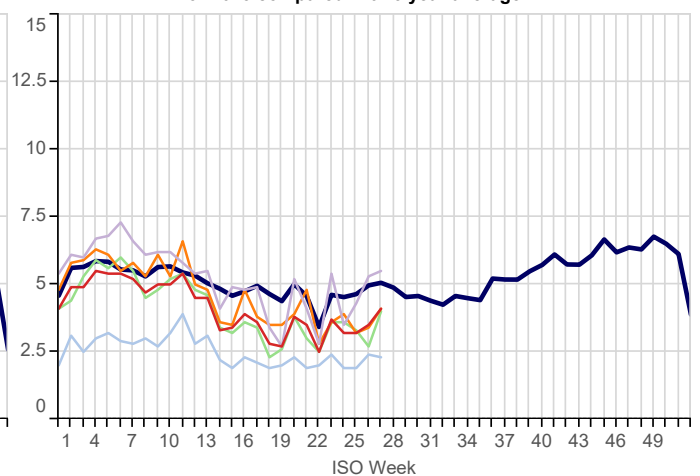

Scabies (ICD10: B86)
Weekly incidence (per 100,000 all ages) by region
for 2023 compared with 5 year average

Symptoms involving Skin & Oth Integument Tiss (ICD10: R20-R23)
Weekly incidence (per 100,000 all ages) by region
for 2023 compared with 5 year average

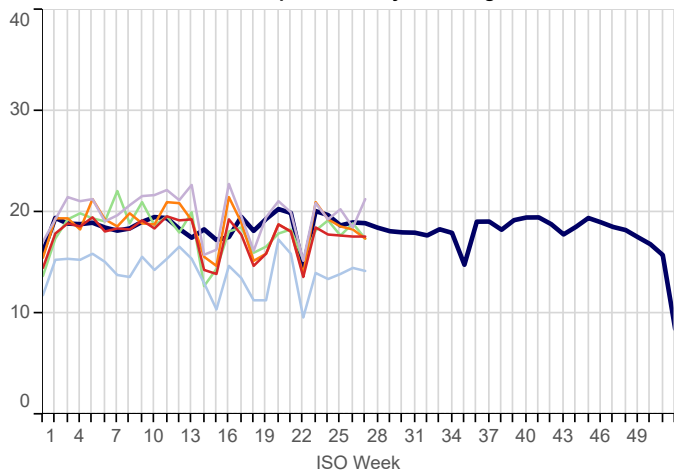

Impetigo (ICD10: L01)
Weekly incidence (per 100,000 all ages) by region
for 2023 compared with 5 year average

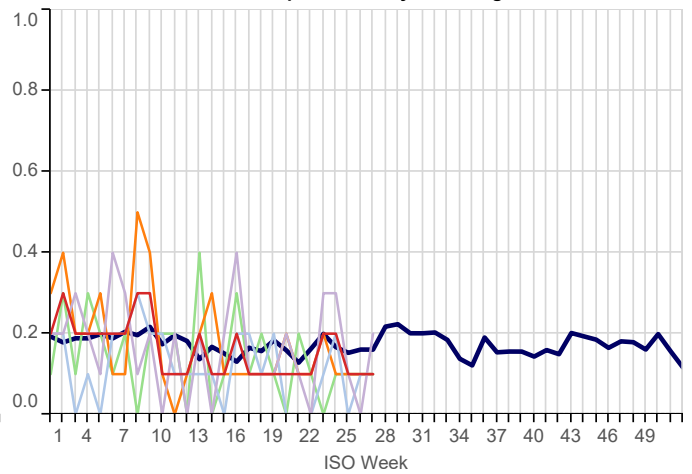

6. Disorders Affecting the Nervous System

5yr Avg National North London South Midlands And East

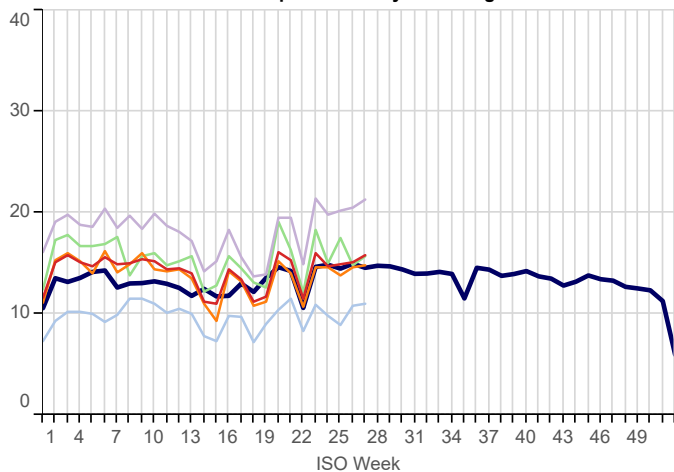

Disorders of The Peripheral Nervous System (ICD10: G50-G64,G70-G72)
Weekly incidence (per 100,000 all ages) by region
for 2023 compared with 5 year average

Meningitis/Encephalitis (ICD10: A170-A171,A390,A38-A85,A87,G00-G05)
Weekly incidence (per 100,000 all ages) by region
for 2023 compared with 5 year average

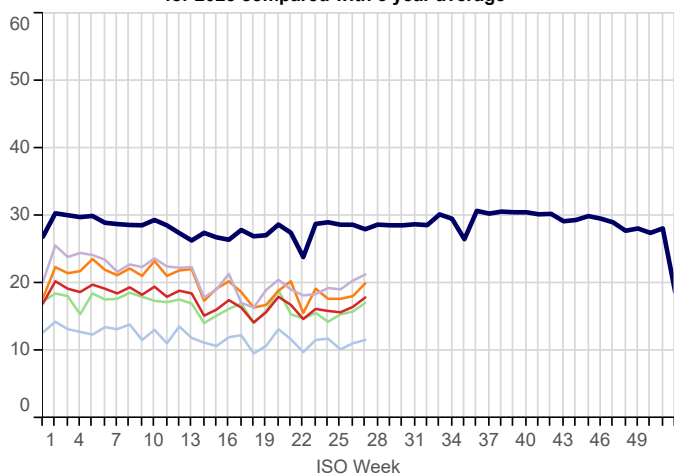

Symptoms Involving Nervous & Musculoskeletal (ICD10: R25-R29)
Weekly incidence (per 100,000 all ages) by region
for 2023 compared with 5 year average

7. Genitourinary System Disorders

Urinary Tract Infection/Cystitis (ICD10: N30,N390)
Weekly incidence (per 100,000 all ages) by region
for 2023 compared with 5 year average

8. Tabular Summary by Disease

FURTHER INFORMATION:

About the report

Focus

The first two pages of data within this report focus on Influenza-like illness and COVID-19, in order to provide information about seasonal influenza and early warnings of any epidemic.

Rate calculation

Each weekly incidence rate is presented per 100,000 population. All presentations are for males and females, and for all age groups, unless otherwise stated.

The denominator used for this report is taken from our most recent extract of data from GP practice systems, and includes all patients currently registered with eligible practices. The denominator varies week-on-week as patients register and deregister; it may also be the case that all patients from an individual practice are excluded because of problems with the data extraction from that practice in a specific week. As stated above, patients who have withheld consent for data-sharing are excluded.

In addition to the national rate, we present data for the four NHS England regions: North; Midlands and East; South; and London.

Five-year averages

Weekly rates are set against a five-year average, previously we reported against a ten-year average. The change to a five-year average was made because longer-term trends in the incidence of disease have led to weekly rates for certain diseases becoming increasingly divergent from their ten-year average. The use of five-year averages lessens this effect and enables more meaningful comparison.

Threshold calculation for Influenza-Like Illness (ILI)

We are now using the Moving Epidemic Method (MEM) to calculate threshold and intensity levels for Influenza-Like Illness (Graph A, page 2 and Table E, page 4 of this report). MEM works by identifying seasonal epidemic peaks and then calculates thresholds and intensity levels based on the pre and post epidemic values. This allows us to report the severity of ILI against multiple thresholds, rather than a simple comparison with the five-year average as the wide variation in ILI year on year, especially during the seasonal peak, makes the average less representative.

In addition to the All Ages thresholds, we have also calculated thresholds for three age bands: those aged under 15, 15-64 year olds and those aged 65 and over. ILI incidence rates vary among different age groups, and the age-specific thresholds allow us to highlight epidemics where ILI disproportionately affects a particular age group.

This methodology is used by the European Centre for Disease Prevention and Control to standardise reporting of influenza activity across Europe, and is also in use by the UK Health Security Agency. Full details of the methodology can be found in: Vega *et al.* (2012) Influenza surveillance in Europe: establishing epidemic thresholds by the moving epidemic method. Influenza and Other Respiratory Viruses 7(4), 546–558.

Both the *all-ages* thresholds and the *age-specific* thresholds are shown in Table E, page 4. Ten years of data were used for *all-ages* and *age-specific* thresholds calculation (winter seasons 2011/12- 2021/22 excluding the pandemic year 2020/21).

About the Royal College of General Practitioners (RCGP) Research and Surveillance Centre (RSC)

Acknowledgement:

Staff from the Data Science department at the National Physical Laboratory (<https://www.npl.co.uk/data-science>) assisted in the provision of and extension of the primary care national surveillance reports during the 2020 SARS-CoV-2 pandemic; as well as adding resilience.

What we do

The RCGP RSC was established in 1967, with the current name in use since 2009. The Centre is an internationally renowned source of information, analysis and interpretation concerning the onset, patterns, prevalence and trends over time of morbidity in primary care. The RSC is an active research and surveillance unit that collects and monitors data; its most important research is the surveillance of influenza and the monitoring of vaccine effectiveness.

The RSC data and analytics hub is housed at the Oxford-Royal College of General Practitioners Research and Surveillance Centre.

Further information about the RSC can be found on our website:

<http://www.rcgp.org.uk/rsc>

Our data extraction process and information governance

Data are extracted twice weekly from practice systems by Magentus data management and EMIS-X on the RCGP's behalf. Patients who have withheld consent for data sharing are excluded from the extraction process.

Data are pseudonymised as close to source as possible. Data are held on secure servers at the RCGP data and analytics hub at the Oxford-Royal College of General Practitioners Research and Surveillance Centre. Both Magentus data management and the University of Oxford are Registered and compliant with the Data Protection Act and fully compliant with all relevant NHS Digital data information governance best practice.

What the data is used for

The RCGP RSC has been providing reports weekly about health and disease, called the Weekly Returns Service (WRS) since 1964. The WRS monitors the number of patients consulting with new episodes of illness classified by diagnosis in England and provides weekly incidence rates per 100,000 population for these new episodes of illness. It is the key primary care element of the national disease monitoring systems run by the UK Health Security Agency. The bulletin can be found at the following URL:

<https://www.gov.uk/government/collections/syndromic-surveillance-systems-and-analyses>

In addition to the WRS, the data is used for other research studies. Any other uses of the data for research follow ethical approval or agreement from NIHR proportionate review, and where relevant Health Research Authority Confidential Advisory Group advice that further approval is not needed. Full details can be found on our website:

<http://www.rcgp.org.uk/rsc>

For further information

For further information about the work of the RSC, or if you would like to be included on our email notification list, please contact:
